Attachments: [RFS2 Qs andAs final rule 1-15-10 clean.doc](#)

Clean, updated version.

Includes comments / updates from Paul M, Karl, Kathryn, Julie, Meg and Megan.

TCD is going to send me their updates at noon today, which I'll incorporate then. Also, note the two highlighted questions: **What are EPA's plans for assessing new fuels and feedstocks? Why did EPA select a 30 year time horizon and zero percent discount rate in the final assessment?**

You may already be preparing responses on these. These will be of interest and importance.

I still need John's crew to look thru and update the general program facts and program structure sections.

Once I get these updates and revisions, I'll update and redistribute.

Other edits, comments, checking in welcome. Need to be done soon.
Thanks, Paul
